## METAL FABRICATION

The skilled craftsmen at Robert Gibb & Sons are experts at performing virtually any type of sheet metal work, metal fabrication and welding. We specialize in custom-built ductwork of any size, shape or angle.

Custom metal fabrication is our specialty in our 10,000 square foot sheet metal facility. We have a complete inventory including:

- GALVANIZED G-90 COIL STOCK
- COLD ROLLED BLACK IRON
- STAINLESS STEEL
- ALUMINUM

We offer full fabrication services utilizing a computerized plasma cutting table, computerized coil line and specialized forming equipment for shaping and molding to exact specifications. IN addition to the in-house fabrication services, Robert Gibb & Sons can design, construct and install any size ventilation system or specialized fabrication projection such as steel chimneys.

*\*Pricing subject to change \*\*Additional sizing available upon request.*

## HIGH QUALITY CONSTRUCTION

ANY SIZE DUCT AND FITTING AVAILABLE

By prefabricating duct work we can save time and lower your labor costs on the job site.
